

DUBAI AI COMMAND PLATFORM

Aurex AI

A premium SaaS platform helping companies capture leads, answer instantly, qualify prospects, book appointments and scale through installable AI employees.

Real estate first

AI employees

Usage wallet

15-slide v0.2

Recommended initial raise

\$350k-\$500k

Build MVP, run Dubai pilots and create commercial proof.

THE PROBLEM

The gap is not another CRM. The gap is execution.

Dubai businesses buy leads, then lose value when response speed is slow, follow-up is inconsistent and work is split across WhatsApp, calls, email, spreadsheets, calendars and portals.

01

Missed inquiries

Lead value disappears when no one answers quickly.

02

Fragmented tools

Teams cannot see one managed commercial flow.

03

No AI control layer

Generic bots do not map to roles, permissions or handoff.

WHY NOW

Dubai is the right launch market.

AI ambition, real estate velocity and business digitization are converging. The product fits a high-trust, premium and WhatsApp-first commercial market.

ROI

THE SOLUTION

Aurex AI is a command platform.

01

Unified communication

WhatsApp, email, web chat and voice intake.

02

AI employees

Installable roles with scripts, permissions and escalation.

03

Workflow automation

Follow-up, booking, routing and reminders.

04

CRM and pipeline

Lead status, owner, next action and conversion visibility.

05

Usage wallet

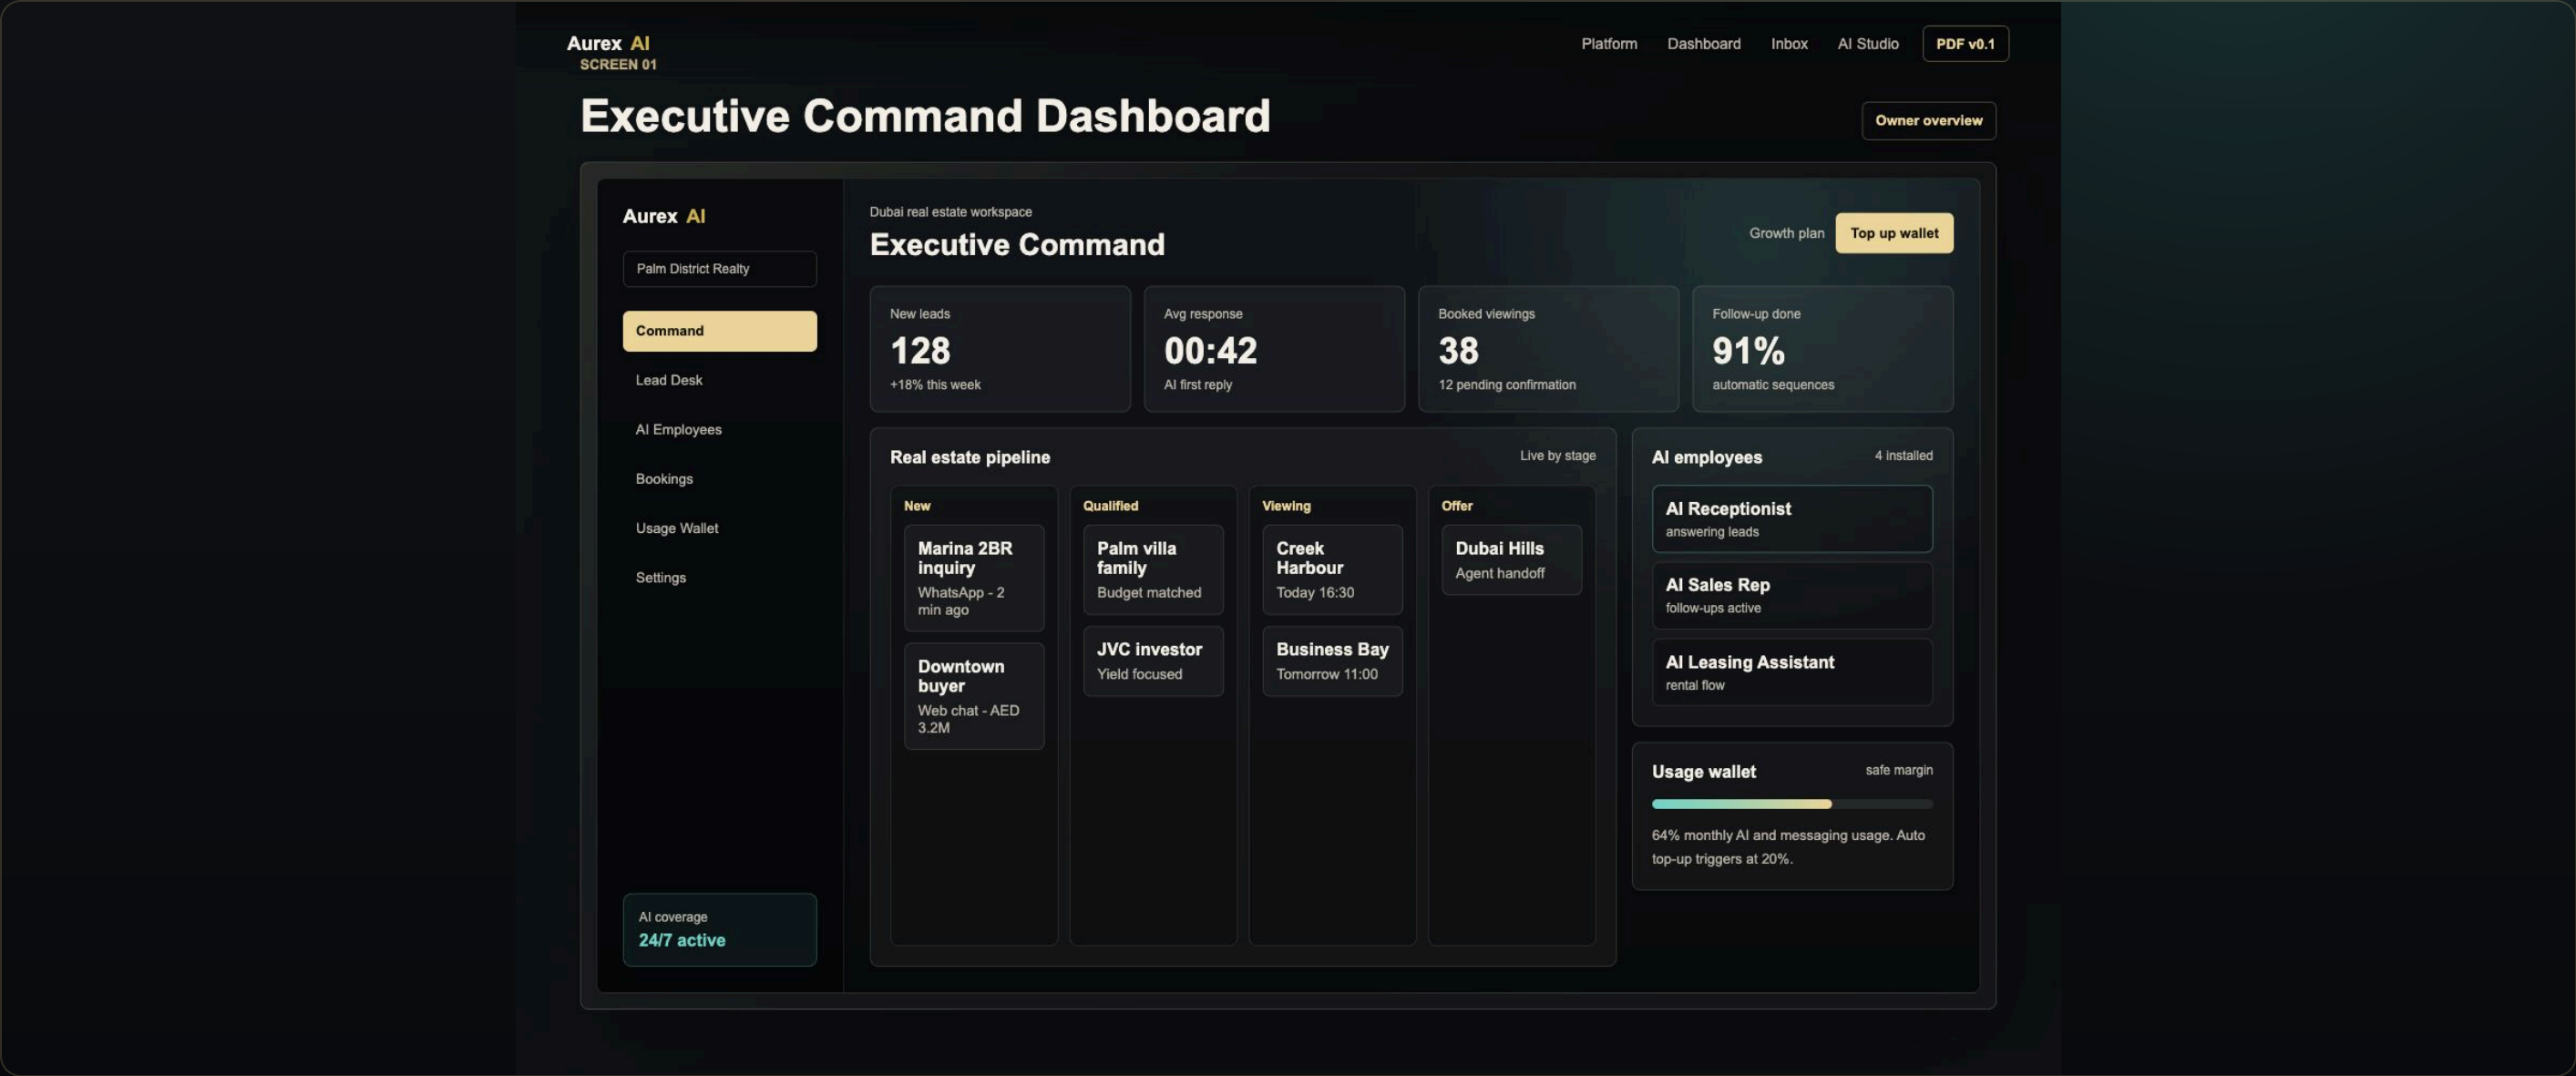

Tokens, voice minutes, WhatsApp, SMS and top-ups.

06

Executive intelligence

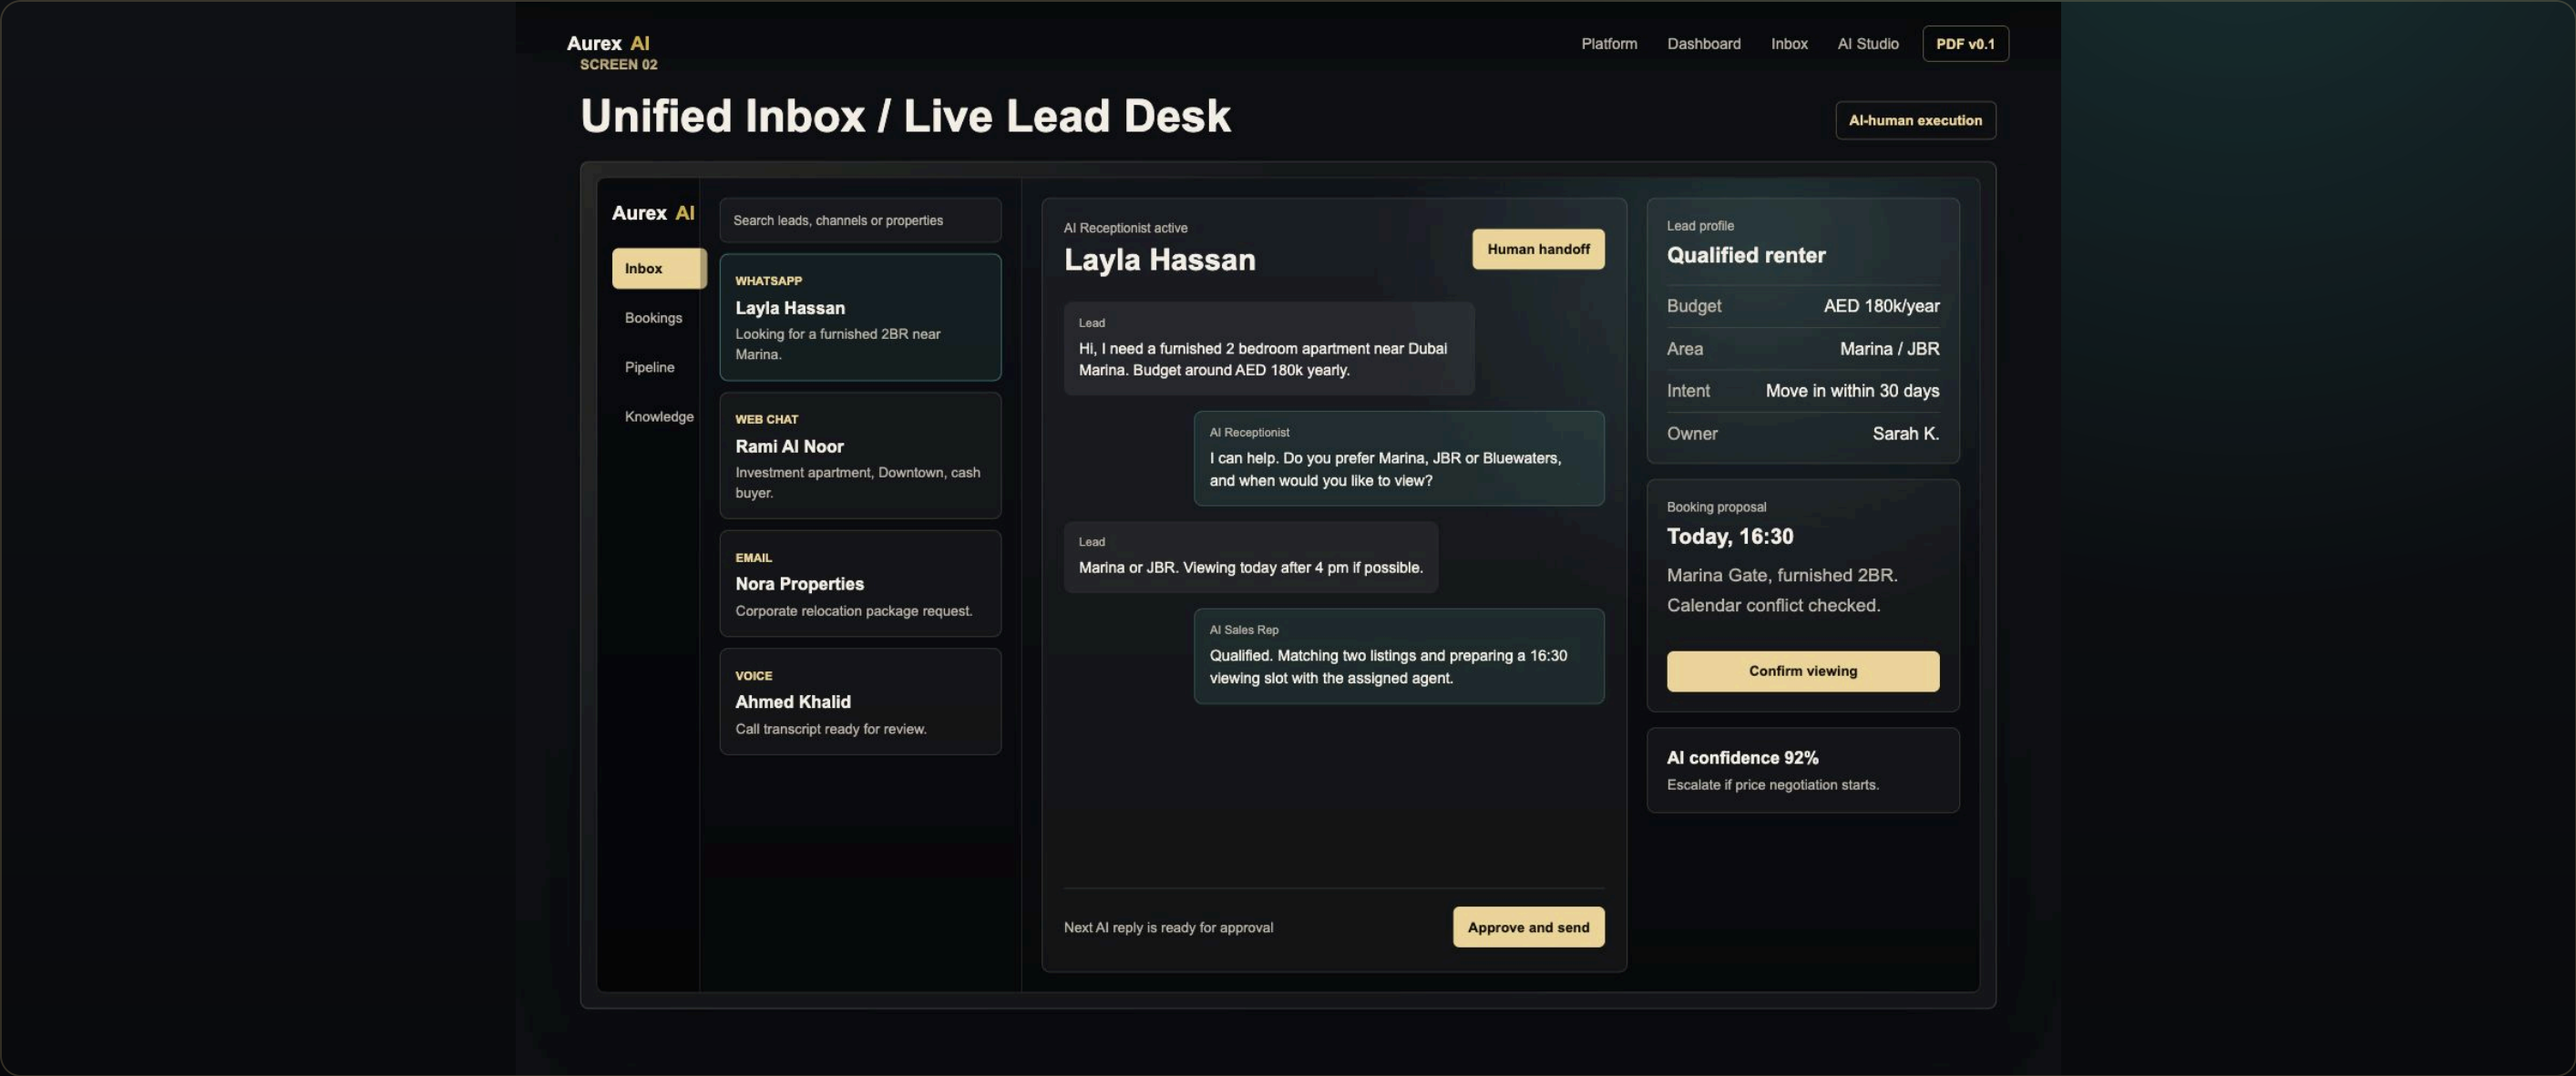

Response speed, booked viewings, revenue and AI performance.

Executive Command Dashboard

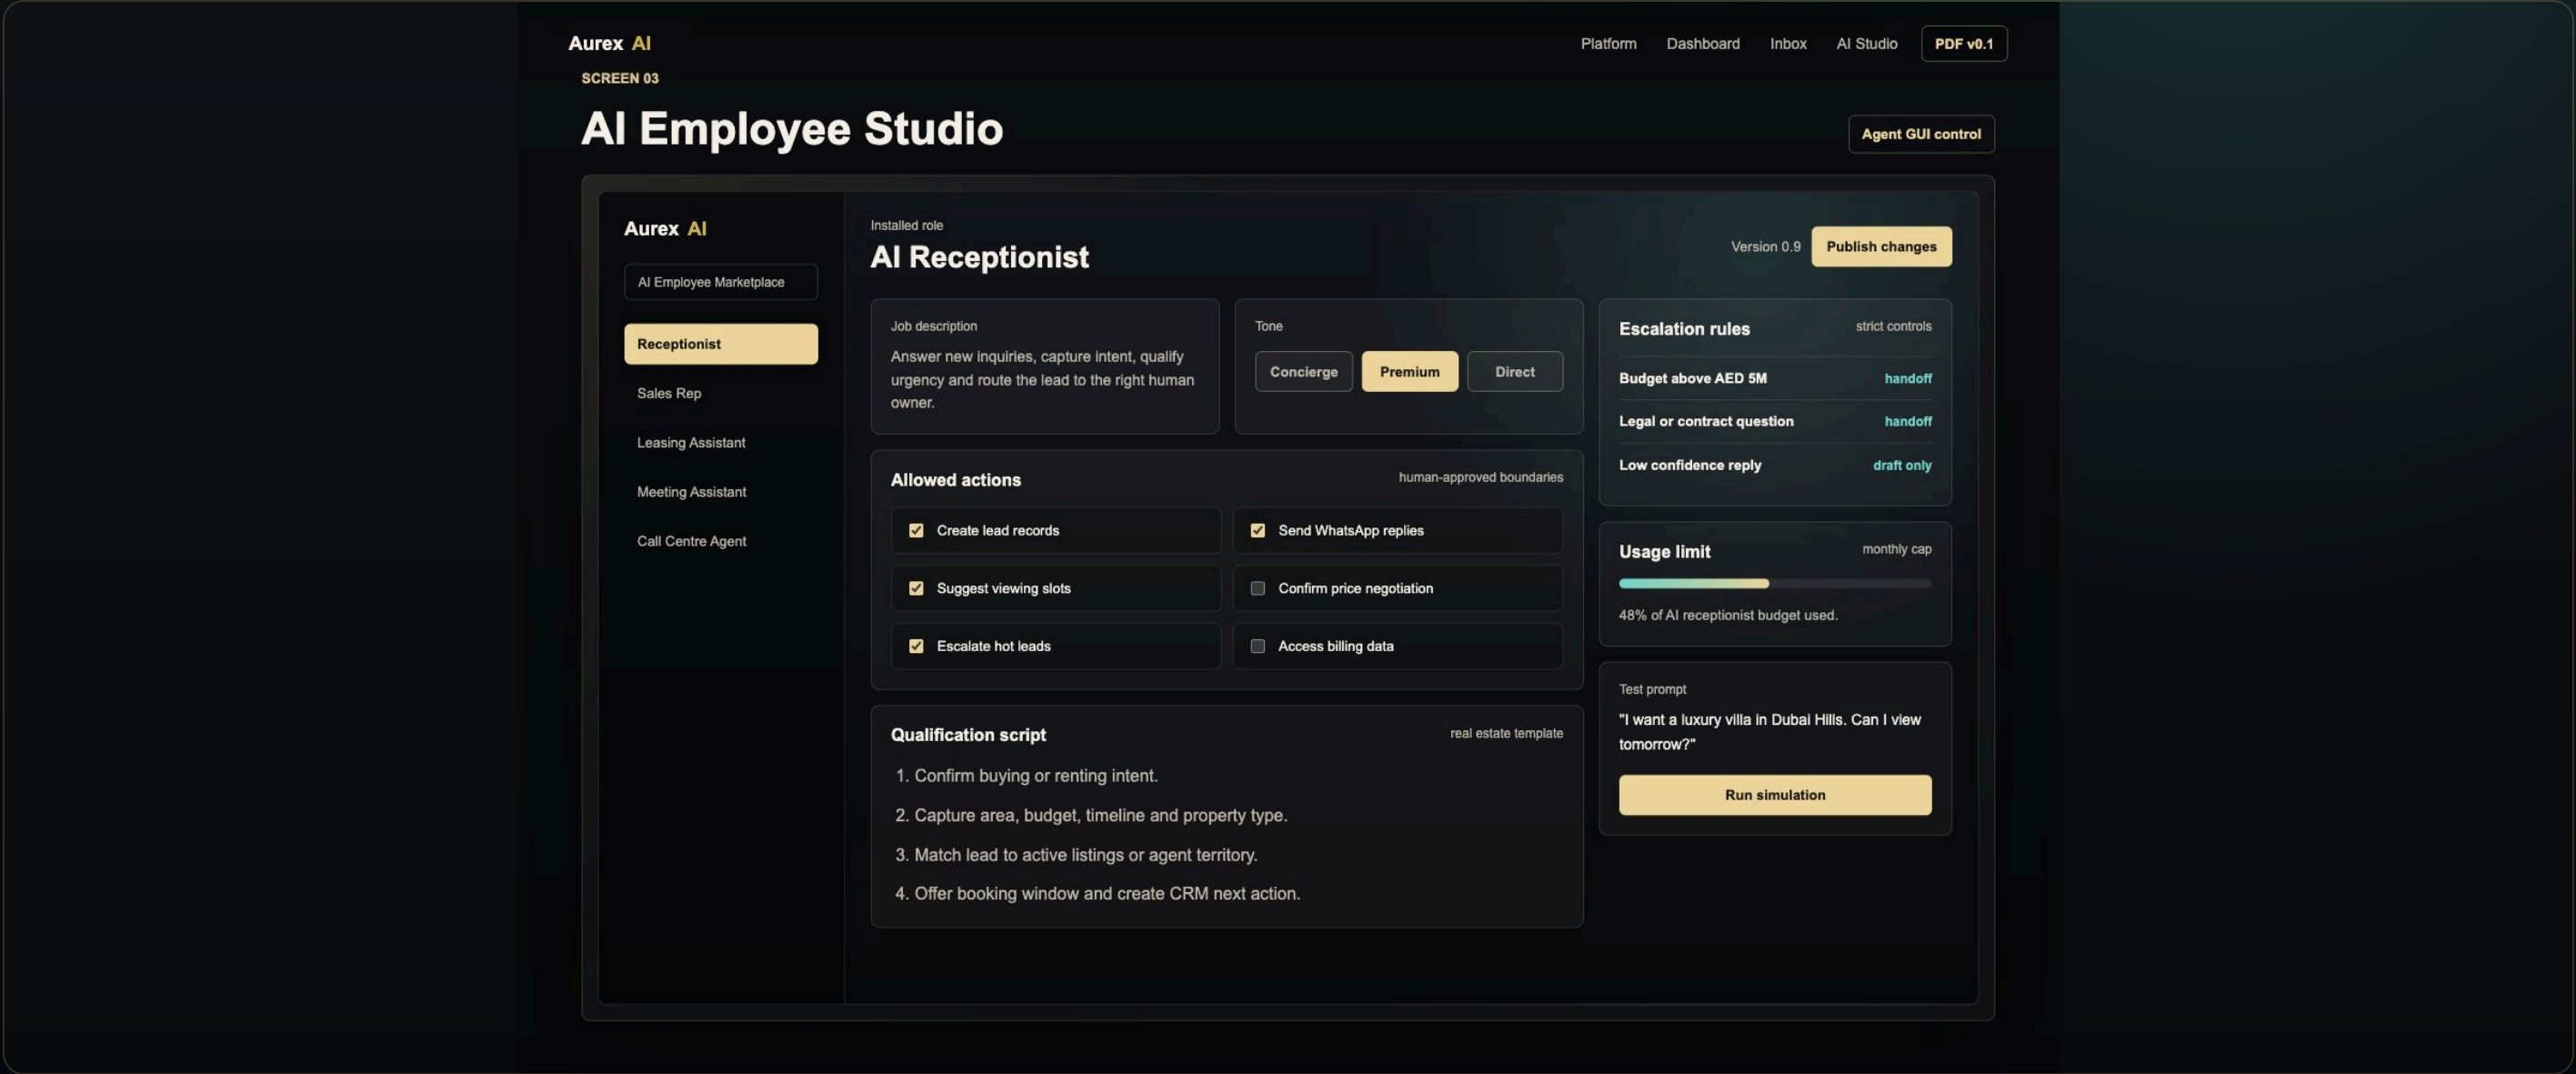

Owner overview: pipeline, AI employees, response speed and usage wallet

Unified Inbox / Live Lead Desk

AI Employee Studio

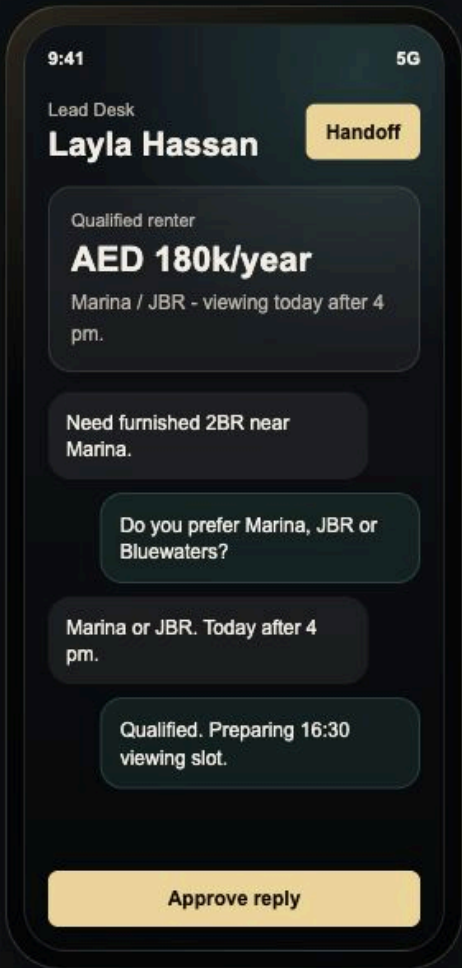

Agent GUI control: permissions, scripts, escalation and usage limits

Native mobile workflows after the web-first MVP.

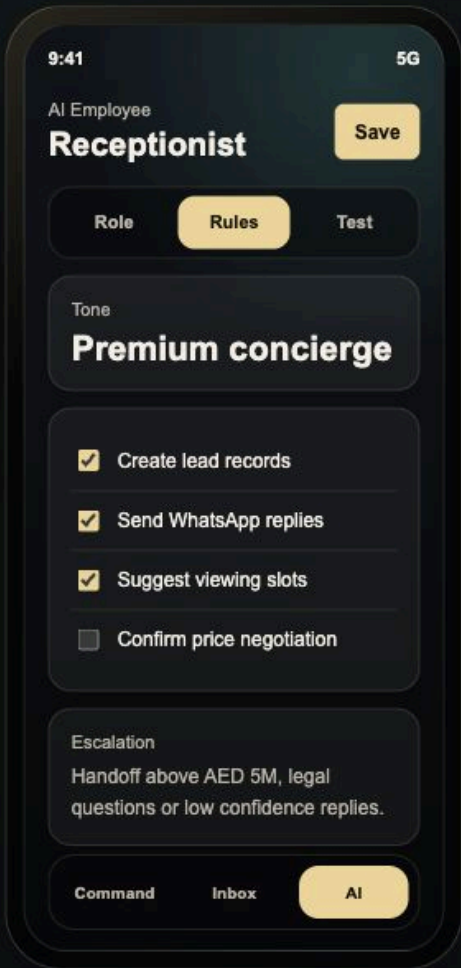

Mobile Command

Native-style owner overview for daily lead and booking control.

Mobile Lead Desk

AI-human conversation flow with booking and escalation controls.

Mobile AI Studio

Native controls for permissions, rules, tone and human-approved limits.

FIRST WEDGE

Real estate first. Prove ROI before broad expansion.

Every real estate inquiry gets answered, qualified, scheduled and tracked automatically, with human handoff when needed.

Lead arrives

AI answers

Qualifies

Books viewing

Follows up

AI EMPLOYEES

Sell roles, not technical features.

AI Receptionist

answers every inquiry

AI Sales Rep

qualifies and follows up

AI Leasing Assistant

handles rental flows

AI Meeting Assistant

summaries and action items

AI Recruiter

screens and schedules

AI Call Centre Agent

controlled voice workflows

BUSINESS MODEL

The model protects margin from day one.

Do not sell unlimited AI. Sell platform, setup and usage with margin.

Platform subscription

\$499 to \$12k+ /
month

Setup fee

\$2k to \$75k+

Usage revenue

tokens, calls,
messages, storage

Premium packs

AI employee and
vertical templates

Build in controlled phases.

Phase 1

Real estate MVP

CRM, lead desk, AI receptionist, AI sales assistant, booking, usage wallet.

\$150k-\$300k

Phase 2

Stronger platform

Inbound calls, reporting, onboarding, meeting assistant, reputation and integrations.

+\$150k-\$350k

Phase 3

Multi-niche expansion

Call centre, mobile app, HR, documents, marketing and vertical templates.

+\$300k-\$800k+

INVESTMENT LOGIC

Recommended initial raise: \$350k-\$500k.

Enough to build the MVP, run Dubai real estate pilots, cover AI/voice usage risk and avoid stopping before commercial proof.

60%

Product and engineering

15%

AI, voice, cloud and infra buffer

15%

Dubai pilots and go-to-market

10%

Legal, compliance, design and contingency

NEXT STEPS

From concept to investable asset.

Validate name and domains, freeze MVP scope, define pilot package, prepare investor data room and collect real estate pilot commitments.
